---

## OBJECTIVE:

Looking for an R&D or Data Analytics role where I can work on understanding problems, reviewing relevant information, and using data to draw clear conclusions. I want to start with genuine learning and contribute with careful research and logical analysis.

## EXPERIENCE:

- **Web Development Intern**

**Priority Technologies Inc.** - **Dover, DE-19901, USA** - **Mar 2024 - Aug 2024**

- Collaborated with the team to test features, identify issues, and document findings
- Analyzed user requirements and translated them into clear, functional components
- Worked on structured problem-solving tasks like debugging, optimizing workflows, and improving user-facing features

- **Python Developer Intern**

**P&P InfoTech Pvt Ltd.** - **Indore, MP, INDIA** - **May 2023 - Jun 2023**

- Assisted in cleaning and preparing data for internal use, ensuring accuracy and consistency
- Worked on small Python tasks involving data handling, basic calculations, and writing simple scripts

## EDUCATION:

- **B. Tech. Computer Science Engineering** **2021 - 2025**  
IPS Academy, Indore - CGPA: 7.51 (Aggregate CGPA up to 8th semester)
- **12th Grade** **2020 - 2021**  
The Creative Public Hr. Sec. School, Khargone - Percentage: 73%
- **10th Grade** **2018 - 2019**  
The Creative Public Hr. Sec. School, Khargone - Percentage: 70%

## SKILLS & TOOLS:

- **Technical Skills:** Python | SQL
- **Research Skills:** Literature review | Basic report writing | Problem investigation
- **Analytical Skills:** Data cleaning | Data interpretation | Logical reasoning
- **Tools and Technologies:** Git | GitHub | ChatGPT | Notion | Zotero | NVivo | Excel
- **Soft Skills:** Problem Solving | Communication | Teamwork | Adaptability | Quick learning

## PROJECTS:

- **Portfolio Website:** - [Link](#) | Analyzed multiple developer portfolios for structure and clarity issues. Used these insights to design a clean and straightforward portfolio layout.
- **MOTRAX:** - [Link](#) | Explored common financial challenges of small business owners through discussions and online research. Found that existing tools were too complex and didn't offer simple guidance. Designed a system that provides easy, actionable financial insights.
- **Accident Detection System:** - [Link](#) | A Reviewed accident-related cases and sample videos to understand real problems. Noticed the lack of a simple upload-and-analyze system with automatic alerts. Developed a tool that analyzes videos and sends alerts with essential details
- **Future Guide:** - [Link](#) | A Conducted short student interviews to understand their career confusion. Identified a gap in existing roadmap sites — they show the path but not the learning resources. Built a solution that combines both roadmap and resources based on this insight

## CERTIFICATIONS:

- Generative AI program by Outskill – (ongoing) **2025**
- AWS Cloud Foundation Certificate by Amazon web service **2024**
- McKinsey forward Program – (ongoing) **2025**
